Famous Throughout U.S.A.

Henderson's Invincible Asters

Shown in Colors on the Front Cover

"They Are Royally Grand" the Largest and Most Beautiful of all Asters

Henderson's Invincible are the highest achievement in China Asters, and a superior race in every way. The plants are of very healthy, robust, branching growth, about 2 feet high—though under best culture often 3 feet—producing, on long stems, massive Chrysanthemum-like flowers of perfect form and graceful outline, exceedingly double to the very center. When well grown the flowers of Henderson's Invincible Asters average 3½ inches across; 4-inch flowers are quite common, and if grown especially for cut flowers, the side branches pruned, allowing a plant to carry not over 8 or 10 flowers, one flower to a stem, their size will then be enormous, measuring 4½ and 5 inches across. These magnificent blossoms, are unsurpassed as cut flowers for vases and home decoration.

Imperial or "Daybreak" Asters

(Shown in colors on this page)

These Asters—made in America—are Mid-summer flowering varieties, varieties, healthy and vigorous in growth, of upright bushy habit and very profuse bloomers—veritable bouquets of flowers. The flowers—borne on good, long, stiff stems—are so very double as to appear almost like balls. The petals, short and narrow, are slightly folded and of durable lasting substance. While splendid as cut flowers, it is the bedding Aster for our American climate and conditions.

Henderson's Giant Comet Asters

Also known as Astermums and Mammoth Ostrich Plume Asters

These truly grand Asters are a highly developed American type of the German Comet, or Mammoth Ostrich Plume Asters and are far superior to imported strains. The flowers are of immense size, 4 to 5 and often 6 inches across, composed of long wavy twisted petals, gracefully formed into loose, yet densely double, half globes, equaling some of the finer Ostrich Plume Chrysanthemums. The plants, of luxuriant branching growth, attain a height of 18 inches to 2 feet, each plant bearing from 20 to 30 of these magnificent flowers on very long stems, which gives them an added value for cutting and vasing.

**A Great Advance on Old Varieties
HENDERSON'S "Mount Vernon"
Collection of Six Giant Snapdragons**

The continuous-blooming qualities of the Snapdragons, their ease of culture and pure, bright colors, entitle them to a permanent place in all gardens. Although perennials in the South, they do splendidly when grown as annuals in the North; spring sown seed produces flowering plants by July, which continue to bloom in increasing profusion until frost. When planted in beds the plants should be placed 9 inches apart each way. When grown individually it is advisable to stake the plants on account of the weight of the large spikes of bloom. Height, 2 feet.

DIDISCUS COERULEUS Annual Blue Lace Flower

HENDERSON'S EVER-BLOOMING ANNUAL HOLLYHOCKS

Every Garden May Now Be Glorified with Queenly Hollyhocks Grown as Easily and Flowering as Quickly from Seed as Any Garden Annual

The old favorite Hollyhock can seldom be flowered from seed before the second year, and as the young plants frequently winter-kill, it has limited the cultivation of Hollyhocks to those willing to give the young plants special winter care. All of this bother is obviated in growing our annual Hollyhocks, for they flower the first season from seed.

The plants from early-sown seed set out in May commence blooming in July, the May-sown in August, and in either event then flower profusely until frost.

There are maroon, black, pink, chamois-rose, apricot with garnet throat, crimson, canary-yellow, pink with claret throat and veins, bluish with carmine lacings, cerise, white, scarlet, bluish with white throat magenta, apricot with buff margin, wine-red with white edge, etc., etc. (See illustration.)

It will be covered with large bluish green heart-shaped leaves, and studded from July until frost with immense saucer shaped flowers, glistening like white satin. They are also subtly fragrant. The small numerous flowers, borne in the fall, are also of a bright red color. An attractive plant at all times, either in garden beds or in pots, placed at intervals in beds of white Sweet Alyssum, or among "Dusty Millers," the effect is very fine. (See illustration.) THE "HENDERSON"

LAWN GRASS SEED

IT IS READY
FOR
MOWING

Sow the "Henderson" Lawn Grass Seed and Obtain a Grassy Carpet of Unrivalled Emerald Green IN FOUR WEEKS FROM SOWING IT IS READY FOR MOWING

The "Henderson" lawn grass seed mixture has been thoroughly tested by country-wide use for more than half a century. It is the fruit of years of experience and close study of American conditions and is undoubtedly the best for the American climate. By its use a deep green, velvety sward, free from clumps, can be produced in from four to six weeks' time.

The "HENDERSON" LAWN GRASS SEED is a carefully arranged combination of fine-leaved, dwarf Grasses, which are at their best during different months of the year, thus keeping a lawn constantly covered with enduring green. It is impossible to make an enduring lawn by sowing seed of a single variety, which will only grow vigorously for a portion of the year. Kentucky Blue Grass, for instance, which is sometimes exclusively recommended for lawns, requires two years to form a close sward, and also loses color in hot weather.

Triumphs of Vegetable Perfection

SPINACH—Continued

HENDERSON'S NEW PRINCESS JULIANA

809 Is of the long season type, with large, crumpled, rich, dark green leaves. It is valuable either for spring or autumn planting, popular because of its rapid, uniform growth and delicious, tempting flavor. Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 65c.; transportation paid.

NORFOLK SAVOY-LEAVED

808 A very popular variety to sow for the late fall cutting. It is quick growing and has fleshy, dark green leaves as deeply crumpled as a Savoy Cabbage. Price, pkt. 10c.; oz. 15c.; $\frac{1}{4}$ lb. 25c.; transportation paid.

NEW ZEALAND

806 The Cut and Come Again Spinach. During the hot summer months, when ordinary Spinach bolts and goes to seed, the New Zealand Spinach is at its best. It thrives on almost any soil and withstands drought, producing great quantities of succulent, rich green leaves of delightful delicate flavor. As the tops are cut off, side shoots develop and in a few days another crop may be cut. Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 60c.; transportation paid.

SWISS CHARD

234 Lucullus Crumpled-Leaved. This is quite distinct from the old and well-known variety. The whole plant is taller and the leaves, instead of being smooth, are deeply and closely crumpled, similar to a Savoy Cabbage. It is tasty, palatable and preferred by many. (See illustration.) Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 75c.; transportation paid.

SQUASH

822 Henderson's Delicata. Delicata is so prolific that last season, from twelve hills of two plants each, 352 perfect Squashes were gathered. It is of such convenient size (about 9 inches long) that the entire Squash can be used at one time. (See illustration.) Price, pkt. 15c.; oz. 40c.; $\frac{1}{4}$ lb. \$1.25; transportation paid.

834 Henderson's Long Island White Bush. The white scalloped "Patty Pan" or "Cymling" has for years been a favorite summer Squash, on account of its earliness, etc., but this new sort is a vast improvement. The plants are the true bush habit. Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 75c.; transportation paid.

836 Mammoth Bush Summer Crookneck. It is early and the fruits are large, measuring 20 to 24 inches in length, freely produced on healthy vigorous plants of compact bush habit; fruits heavily warted; surface color deep golden, flesh yellow. Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 75c.; transportation paid.

832 Large Warted Hubbard. It is named on account of its greater size, and the excessive rough "warted" surface of the fruits. This is of no value in itself, but heavy warts indicate a hard shell, and the harder the shell, so much the better will the Squash keep. Price, pkt. 10c.; oz. 25c.; $\frac{1}{4}$ lb. 75c.; transportation paid.

TOMATO

EARLIANA

885 This is still the best extra early Tomato for the family garden as it bears a very heavy crop quite early in the season. Price, pkt. 10c.; oz. 50c.; $\frac{1}{4}$ lb. \$1.50; transportation paid.

HENDERSON'S PONDEROSA Sometimes called "Beefsteak"

900 For 39 Years the Best and Most Popular in the American Garden—Produces Fruits Magnificent in Size—Delicious in Flavor and in Great Profusion. From its first appearance it gripped all who grew it, and each recurring season sees thousands more added to the number of its admirers who have sent us thousands of testimonials. The original Ponderosa can only be obtained direct from us. (See illustration.) Price, pkt. 10c.; 3 pkts. 25c.; oz. 90c.; transportation paid.

HENDERSON'S WINSALL

915 Henderson's Winsall is about five days later than Ponderosa in maturing its first fruits, but its second fruits seem to ripen more rapidly than do the fruits of Ponderosa. The coloring is indeed perfection; the bright red extending close up to the stem end. Henderson's Winsall is undoubtedly the most meaty tomato ever produced; the entire fruit being edible, tender and delicious, and remarkable for an almost entire absence of seeds. (See illustration.) Price, pkt. 25c.; 3 pkts. for 60c.; $\frac{1}{2}$ oz. \$2.00; 1 oz. \$3.50; transportation paid.

COOPER'S SPECIAL

880 Cooper's Special is a great treat for tomato lovers, absolutely free from core or acid. It is of medium size globe-shaped, piquant meaty flavor, very early in maturing. Price, pkt. 10c.; oz. 75c.; transportation paid.

*TURNIP

930 Purple Top White Globe. The upper surface of the bulb is reddish purple, the lower part is white. It grows smooth, has a small root and medium-sized tops. The flesh is pure white, crisp, very fine and it is one of the best sorts to store for winter. Recommended for fall crop. Price, pkt. 10c.; oz. 15c.; $\frac{1}{4}$ lb. 35c.; transportation paid.

918 Early Purple Top Milan. Resembles White Milan, but has purple top. Price, pkt. 10c.; oz. 20c.; $\frac{1}{4}$ lb. 60c.; transportation paid.

922 Early White Milan. An extra early variety of rapid growth, and with very small leaves. Price, pkt. 10c.; oz. 20c.; $\frac{1}{4}$ lb. 60c.

940 Yellow Globe. A yellow-fleshed, globe-shaped variety, of large size; a splendid winterkeeper; excellent for both table and stock. Price, pkt. 10c.; oz. 15c.; $\frac{1}{4}$ lb. 35c.; transportation paid.

Hardy Perennials belong to that group of the floral kingdom that is botanically classified as herbaceous plants. This class grows and flowers during the summer, then die back to their roots during the winter and reappear the following spring. Once established they are a constant source of pleasure, presenting a variety of form and color throughout the season.

The twelve varieties named flower at different periods and combine a variety of form with richness of color. The letter prefixed to each variety is a key to the flowers shown in the illustration on this page.

Three plants of each planted according to the plan at the bottom of this page will make a garden ten feet long by four feet wide
